

Delivery of Effective Clinical Supervision

(Course Code: 1920/22)

Course Description

Despite being a seasoned clinician, being a clinical supervisor requires a unique skill set. This course helps participants to understand the roles and responsibilities of a clinical supervisor and to equip essential skill sets of effective supervision in case management setting, individual or group skills supervision.

Trainers

Dr. Powell Ling Yuet-man, Candice

Clinical Psychologist, New Life Psychiatric Rehabilitation Association

Candice is a practising clinical psychologist in New Life Psychiatric Rehabilitation Association. She obtained two master degrees of Trauma Psychology and Clinical Psychology, and a doctoral degree in Clinical Psychology in 2017. She has been devoting in the development of mental health recovery, and highlighted projects include translating 100 Ways to Support Recovery and Person-centered Care Planning (PCCP) into Chinese. She developed Transdiagnostic Cognitive Behavioural Therapy in groups, TCBT(G), and self-compassion program for carers supporting people in recovery. She is the project lead of eGPS to provide low-intensity cognitive behavioural therapy (LICBT) for mild to moderate CMD.

Ms. Yeung Tsui-yee, Gladys

Clinical Psychologist, New Life Psychiatric Rehabilitation Association

Ms. Yeung graduated from Master of Clinical Psychology from The Chinese University of Hong Kong. She is the clinical psychologist of the New Life Psychiatric Rehabilitation Association. She offers psychological assessment, individual and group treatment for adults in needs. She has completed a certificate course on Low Intensity Psychological Therapy Training Programme conducted by University of Exeter. She has been running an LI CBT service since 2016. She offers both case management and clinical skills supervision to LI CBT practitioners.
